SATURDAY, DECEMBER 18, 2021

8:00 – 8:45 AM

REGISTRATION / BREAKFAST

8:45 - 9:00 AM

Welcome & Workshop Information
Chandana Banerjee, MD, MPA

9:00 – 12:00 PM

Workshop 1: Medical Aid in Dying

The aim of this workshop is to provide perspectives, insights and practice abilities of Medical Aid in Dying in end of life care as applicable to different terminal diagnoses and understand important perspectives of the prescribing and consulting physicians, pharmacist/pharmacology, clinical social work and the patient/physician navigator, psychotherapy and the all-important experience of the patient and loved ones of someone utilizing medical aid in dying. Exploration of how to better assist patients of different cultures with Medical Aid in Dying. Special skills will be gained in medication regimens, effective communication skills with patients and families and particular attention will be paid to the important relative definitions, history, authorized jurisdictions, clinical competencies, barriers and ethics.

Susan Gess, PharmD, APhA
Bonnie A. McKeegan, LCSW
David Grube, MD
Victoria Ramirez, LCSW, ACHP-SW

9:00 – 12:00 PM

Workshop 2: Communications & End of Life

The aim of this workshop is to enhance understanding of the role that communication plays in palliative care for interdisciplinary healthcare clinicians. This workshop uses a combination of didactic lecture, vignettes, role play activities and group discussion to improve communication skills in multiple areas of care including physical, social, and spiritual needs.

Betty Ferrell, PhD, FAAN, FPCN
Haley Buller, MSHSC

9:00 – 12:00

Workshop 3: Advance Care Planning & Goals of Care

The role of advanced care planning and establishing goals of care extends across multiple medical specialties. We shall explore the many opportunities and tools available to foster these discussions in special patient populations and spur growth in new clinical settings. Special attention will be paid to the goal of bringing home new collaborative opportunities focused around geriatric dementia populations, Emergency Departments and capturing billing opportunities and revenue generation for your practice and health system. In addition to understanding common language and forms like POLST/MOLST and DNR, you will practice "Working Through Wishes" steps in advance care planning as well as specific Advance Directive tools for dementia care planning.

Satheesh Gunaga, DO, FACEP, FACOE
Francesca Arnoldy, B.Sci.
Matt Whitaker, MTS, MT-BC

12:00 PM

Adjourn
